AI Protocols Side Meeting

IETF 125

Suresh Krishnan / Dapeng Liu

Agenda

Topic	Time	Content
1. Welcome	17:00-17:05 (5 min)	**Chairs Intro & Goals (Suresh & Dapeng)**
2. Focus area: Transport	17:05-17:20 (15min)	- **Overview of Agent Transport Protocol/MoQ**: Cullen - **Agent communication over MoQ**: Dapeng

3. Focus area: Authorization	17:20-17:45 (25 min)	- **Authorization related work (25 min)**
		  - **AI Agent Authentication and Authorization :** Yaroslav
		  - **Agent Operation Authentication** : Dapeng
		  - **Selective Disclosure of Agent Capabilities :** Suhas
		  - **Additional work:**
		  - Agent Interactions on Terminals (Shuping)
		  - IDDA (Meiling)
		  - Cross domain authorization (Jean)

4. Discussion and next steps	17:45-18:00 (15 min)	**Charter Change Proposals** **Open Mic** **Next Steps**

Goals of the side meeting

- Provide high level overview of the targeted problem and solution space
  - There are certainly other problems to be solved in the agentic AI space and the goal is **not to be exhaustive**
- Encourage people to comment on charter
  - Aiming at figuring out a minimal but useful charter
  - Tightly scoped charters have a higher chance of success
- Target a working group forming BoF for the Vienna meeting

Focus area: Transport

Focus area : Authorization

Discussions

Next Steps

- Continue outreach to AI protocol ecosystem and open-source communities
  - Engagement from these communities is essential
  - Ensure that the work we do will be useful
- Work on refining the charter on the mailing list
- Continue working on implementations in parallel with proposals
  - E.g. AoA work in the hackathon
    - https://datatracker.ietf.org/doc/slides-125-hackathon-sessd-agent-operation-authorization-aoa/
- Intent is to put in a BoF request for Vienna
  - Deadline for BoF requests is May 22

Thanks!
